INTERVIEW

5 HOURS

TOTAL DELIVERY CAP
5 BUSINESS DAY TURNAROUND

What you receive

1. 60-minute workflow interview
2. Current-state map of people, systems, data, and hand-offs
3. Three automation opportunities ranked by impact, effort, risk, and privacy exposure
4. Three constraints to resolve before implementation
5. Practical 90-day roadmap with sequencing and indicative implementation ranges
6. 60-minute findings review

Best fit

Owner-led or regional teams with repeated work across enquiries, bookings, quoting, email, follow-up, reporting, or hand-offs between systems.

Typical warning signs

- Information is copied or re-keyed
- Staff chase the same details repeatedly
- Enquiries wait in shared inboxes
- Reporting depends on manual spreadsheets
- Software exists, but systems do not connect

Clear boundary

No implementation, configuration, migration, or training. No sensitive or personal information is entered into public generative-AI tools. Any follow-on work requires a new written scope.

Start with one question

Which repeated task consumes the most owner or staff time each week?

Delivered by Dylan Henderson

Senior software engineer with 8+ years of experience across full-stack systems, cloud architecture, performance, security, and workflow design. Henderson Digital is Cowra-based and serves businesses across regional NSW.

Reply to contact@hendersondigital.com.au with the repeated task costing your team the most time.
