

Technical Decision Sprint

Turn an awkward software, integration or platform brief into a defensible build, defer or decline decision.

\$2,200	GST NOT CHARGED PAYMENT BEFORE INTERVIEW	5 HOURS	TOTAL DELIVERY CAP NO IMPLEMENTATION OBLIGATION
----------------	--	----------------	---

What you receive

1. 60-minute decision interview
2. Requirements, constraints and success criteria
3. Comparison of up to three realistic options
4. Risk and cost matrix
5. Written recommendation with next steps
6. 45-minute review

Best fit

- Custom integration or platform brief outside normal delivery
- Competing vendor quotes that cannot be compared cleanly
- Failed build or migration needing a senior second opinion
- Requirements too vague for suppliers to quote consistently

Agency-safe hand-off

Henderson Digital can work behind the referring agency or be introduced directly. The sprint ends with the scoped client and written recommendation returned to the agency.

Clear boundary

No implementation, procurement representation, vendor negotiation, legal advice, penetration testing or production changes.

Delivered by Dylan Henderson

Senior software engineer with 8+ years across full-stack systems, cloud architecture, integrations, performance and security. AWS Certified Solutions Architect. Henderson Digital is Cowra-based and serves regional NSW.

Send the current brief and the decision you need to make to contact@hendersondigital.com.au.
